SKILLS/TECHNICAL STRENGTHS

Acquisition	Requirements analysis, System design, Test planning, Proposal Evaluation Reports, Requirements traceability, Contractor deliverable documentation review	**Integration/Test**	System integration/acceptance testing. Hardware verification testing, Integrated Soldier Touchpoint events
Virtualization	VMWare ESXi, Hyper-V, V-Sphere, VirtualBox	**OS/Apps**	Jira/Confluence, Linux (Red Hat Enterprise), Windows & Windows Server, MySQL, Docker, Git

PROFESSIONAL EXPERIENCE

Optimal Solutions and Technologies (OST) Inc. **Orlando, FL**
Senior Systems Engineer (PEO STRI SETA II) *May 2024 – Present*

- Delivered comprehensive systems engineering support for PEO STRI and the Reconfigurable Virtual Collective Trainer (RVCT) Platform (ACAT II equivalent Army Modernization program with a total contract value of $350.1M).
- Worked as a senior engineer of the Integrated Product Team at PEO STRI to support the RVCT Simulation Program across the entire acquisition life cycle.
- Trusted by program leadership to brief senior stakeholders—including contractors, site customers, and military personnel—to ensure alignment and support throughout RVCT development and fielding phases.
- Served as the lead engineer for the RVCT fieldings to JBLM, WA and Gowen Field, ID, overseeing all aspects of RVCT deployment and testing. Supported Production and Fielding of 348 RVCT-Ground (M1A2 Abrams, M2A3 Bradley, etc.) and 82 RVCT-Air (AH-64E Apache, CH-47 Chinook, UH-60M Black Hawk) systems across 22 sites CONUS and OCONUS.
- Led and supported system acceptance testing, hardware requirement verification, Integrated Soldier Touchpoint events, and Training Manual Validation events to inform future simulation requirements and enhance system training effectiveness.
- Provided technical support for requirements analysis, system design, and test planning; contributed to the development of acquisition and technical documentation.
- Developed Proposal Evaluation Reports (PERs) for the RVCT program to assess risk and determine if cost of contractor proposals is reasonable to the government.
- Reviewed contractor-submitted hardware design drawings for errors, accuracy, and identifying and documenting discrepancies prior to PEO STRI approval.
- Conducted Pre-Fielding Site Surveys to assess site fielding readiness and identify deployment risks or constraints.

Phoenix Defense **Orlando, FL**
Information Technology Systems Engineer *June 2023 – April 2024*

- Played a key role in the successful fielding and exercise support of the JLCCTC training system, ensuring operational readiness for all training scenarios.
- Engineered the installation, configuration, and ongoing maintenance of the JLCCTC software suite, applying patches and updates to ensure optimal performance and security.
- Executed comprehensive test plans and procedures to validate system functionality, identify and document software defects, and ensure the delivery of a high-quality, stable JLCCTC training environment.
- Administered a virtualized environments of Red Hat Enterprise Linux and Windows machines with VMWare ESXi.
- Supported the development of comprehensive training manuals and documentation for system configurations, updates, and new operational procedures.

EDUCATION/CERTIFICATIONS

University of Central Florida **Orlando, FL**
Bachelor of Science in Computer Science
